Independent Auditors' Report

The Board of Directors
Economic Development Bank for Puerto Rico:

We have audited the accompanying basic financial statements of the business-type activities, the major fund and the remaining fund information of Economic Development Bank for Puerto Rico (the Bank), a component unit of the Commonwealth of Puerto Rico, as of and for the years ended June 30, 2008 and 2007, which collectively comprise the Bank's basic financial statements as listed in the table of contents. These basic financial statements are the responsibility of the Bank's management. Our responsibility is to express an opinion on these basic financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the basic financial statements referred to above present fairly, in all material respects, the respective financial position of the business type activities, its major fund and the remaining fund information of Economic Development Bank for Puerto Rico as of June 30, 2008 and 2007, and the respective changes in its financial position and cash flows for the years then ended, in conformity with U.S. generally accepted accounting principles.

The management's discussion and analysis on pages 3 through 10 is not a required part of the basic financial statements but is supplementary information required by U.S. generally accepted accounting principles. We have applied certain limited procedures, which consisted principally of inquiries of management regarding methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

ECONOMIC DEVELOPMENT BANK FOR PUERTO RICO
(A Component Unit of the Commonwealth of Puerto Rico)

Management's Discussion and Analysis

June 30, 2008 and 2007

This financial discussion contains an analysis of the statements of net assets of the Economic Development Bank for Puerto Rico (the Bank) as of June 30, 2008 and 2007, and its changes in financial position for the years then ended. The information included in this section should be read in conjunction with the basic financial statements of the Bank and the notes to basic financial statements.

The business-type activities of the Bank are accounted as enterprise funds, which include the activities of the Bank's principal operating fund and, effective October 19, 2006, those of the Bank's newly created blended component unit, Economic Development Bank Capital Investment (EDBCI). EDBCI was created to account for and focus separately on the activities and investments in local equity capital and venture capital funds, formerly addressed within the Bank. The required financial statements for an enterprise fund are: statement of net assets, statement of revenue, expenses, and changes in net assets, and statement of cash flows. These financial statements report information using accounting methods similar to those used by private financial institutions.

The statement of net assets includes all the Bank's assets and liabilities, classified as current, noncurrent, capital assets, and net assets. This statement provides information as of a specific date about the nature and amount of investments in resources (assets) and the obligations to creditors (liabilities). It also provides the basis for evaluating the Bank's capital structure.

The statement of revenue, expenses, and changes in net assets includes revenue earned and expenses incurred by the Bank for a specific period of time (12 operating months beginning on July 1 and ending on June 30). This statement measures the results of the Bank's operation and can be used to determine whether the Bank has successfully recovered all its costs through user fees and other charges. This statement distinguishes interest and noninterest revenue and expenses.

The statement of cash flows reports cash receipts, cash payments, and changes in cash resulting from operations, noncapital financing, capital and related financing, and investing activities. This statement provides information about the Bank's cash flows and how cash is obtained and used and what was the change in cash balance during the reporting period beginning on July 1 and ending on June 30.

Financial Highlights

- Interest income from investments increased \$10 million or 19.1%, from \$52.5 million in 2007 to \$62.5 million in 2008.

Total liabilities and net assets	<u>\$ 1,312,487</u>	<u>\$ 1,088,488</u>	<u>\$ 223,999</u>	20.58

At June 30, 2008, the Bank's total assets were \$1,312.5 million (\$308.7 million from EDBCI) compared to \$1,088.5 million at June 30, 2007. The increase of \$224 million represents 20.6% of the 2007 total assets balance.

Total loan portfolio increased 13% when compared to balances as of June 30, 2007. The main reason for this growth was a strategic effort by management to increase lending through direct loans, new loan programs, and participations with the commercial banking industry. Loan disbursements increased from \$70.4 million in 2007 to \$104.1 million in 2008, while principal collected on loans increased from \$60.7 million during fiscal year 2007 to \$72.1 million during fiscal year 2008. The related allowance for loan losses maintained a similar level, experiencing a decrease of approximately 6.6% for the period. The net loan portfolio increased by \$28.5 million.

Interest-bearing deposits with other banks, commercial paper, investments, and securities purchased under agreements to resell increased by \$194.2 million when compared to balances as of June 30, 2007, mainly due to a \$275 million increase in funds raised through a new promissory notes issuance.

At June 30, 2008, the Bank's total liabilities were \$1,183.4 million compared with \$964.6 million at June 30, 2007. The increase of \$218.8 million represents 22.7% of the 2007 total liabilities. This increase is mainly due to a \$115 million net increase in promissory notes.

(A Component Unit of the Commonwealth of Puerto Rico)

Management's Discussion and Analysis

June 30, 2008 and 2007

Total time deposits were \$377.5 million as of June 30, 2008. Time deposits consist primarily of certificates of deposit of public funds from other governmental institutions, which totaled \$329.3 million. Deposits from other financial institutions were \$48.2 million. Total time deposits increased by \$89.6 million. As of year-end, the total promissory notes and other note payable balance was \$626.5 million.

Securities sold under agreement to repurchase increased by \$14.5 million, from \$149.9 million in 2007 to \$164.4 million in 2008. Fluctuations in these securities are due to specific market conditions, which provide the Bank with funds and investment opportunities to generate net revenues.

The Bank had net assets of \$129.1 million at June 30, 2008, an increase of \$5.1 million or 4.1% when compared to June 30, 2007. Additional information about net assets composition is presented in note 11 to the basic financial statements.

Comparison of 2008 and 2007 Revenue, Expenses, and Changes in Net Assets

Condensed financial information on revenue, expenses, and changes in net assets is presented below (in thousands):

Revenue, expenses, and changes in net assets	2008	2007	Increase (decrease)	
			Amount	Percentage
Interest income from loans	\$ 13,718	\$ 14,307	\$ (589)	(4.12)%

Operating income and change in net assets	\$ 5,141	\$ 5,037	\$ 104	2.06

For the year ended June 30, 2008, the Bank yielded an operating income of \$5.1 million when compared to the operating income of \$5 million for the year ended June 30, 2007. The increase in operating income resulted from the net effect of the following:

(a) Interest Income

Total interest income increased by approximately 14.1% or \$9.4 million, from \$66.8 million in 2007 to \$76.2 million in 2008. This increase in interest income was mainly the result of increased transaction volumes during the fiscal year.

Management's Discussion and Analysis

June 30, 2008 and 2007

(b) *Noninterest Income*

Noninterest income decreased by approximately \$3.5 million, from \$4.7 million in fiscal year 2007 to \$1.2 million in fiscal year 2008. This decrease was due to a decrease in the net realized and unrealized gains on investment of \$3.5 million.

The decrease in the net realized and unrealized gains on investment results from the combined effect of a \$2.0 million increase in unrealized losses of investment securities, a \$1.6 million increase in the allowance for venture capital investments, and a \$77,000 increase in the gain from sale of investments.

(c) *Provision for Loan Losses*

Compared to the 2007 figures, the provision for loan losses shows an increase of \$500,000. This change is mainly due to management's periodic review of the allowance for loan losses. Impaired loans requiring an allowance for losses increased by \$5.9 million, from \$40.3 million to \$46.2 million, while the specific reserve for these decreased by \$521,000, from \$16.6 million to \$16.1 million. As a percentage of the total loans portfolio, impaired loans represent 28.4% and 21.9% at June 30, 2008 and 2007, respectively. Loans charged off during fiscal year 2008 increased \$3,028,000 when compared to 2007, from \$2,013,000 in 2007 to \$5,041,000 in 2008.

Loan collections increased from \$60.7 million during fiscal year 2007 to \$72.1 million during fiscal year 2008. As a percentage of the total loans portfolio, the allowance for loan losses represents 13.9% and 16.6% at June 30, 2008 and 2007, respectively.

(d) *Interest Expense*

Total interest expense increased by 10% or \$5.2 million, from \$52.5 million in 2007 to \$57.7 million in 2008. This increase in interest expense was the result of increased transaction volumes.

(e) *Noninterest Expenses*

Noninterest expenses increased by approximately \$30,000 or 0.2% during fiscal year 2008. This increase in noninterest expenses resulted from the net effect of the following:

- Professional fees increased by 28.8% or \$174,000, from approximately \$606,000 in 2007 to approximately \$780,000 in 2008. The increase is mainly due to an increase in temporary services during 2008.
- Advertising expense increased by 68% or \$192,000, from approximately \$282,000 in 2007 to approximately \$474,000 in 2008.
- All other noninterest expenses decreased by approximately \$336,000 as compared to fiscal year 2007. This is mainly the result of the net effect of a decrease of approximately \$601,000 in the provision for legal claims, an increase in salaries and employee benefits of approximately \$240,000, an increase of \$100,000 in electric energy expense, a decrease of approximately \$171,000 in the provision for losses on foreclosed assets, and an increase of approximately \$96,000 in other miscellaneous expenses.

Total liabilities and net assets	<u>\$ 1,088,488</u>	<u>\$ 1,051,510</u>	<u>\$ 36,978</u>	3.52

At June 30, 2007, the Bank's total assets were \$1,088.5 million (\$29 million from EDBCI) compared to \$1,051.5 million at June 30, 2006. The increase of \$37 million represents 3.5% of the 2006 total assets balance.

Total loan portfolio increased 4.4% when compared to balances as of June 30, 2006. The main reason for this growth was a strategic effort by management to increase lending through direct loans, new loan programs, and participations with the commercial banking industry. Loan disbursements decreased from \$81.7 million in 2006 to \$70.4 million in 2007, while principal collected on loans decreased from \$63.3 million during fiscal year 2006 to \$60.7 million during fiscal year 2007. The related allowance for loan losses maintained a similar level, experiencing an increase of approximately 2.7% for the period. The net loan portfolio increased by \$7.7 million.

Interest-bearing deposits with other banks, commercial paper, investments, and securities purchased under agreements to resell increased by \$30.6 million when compared to balances as of June 30, 2006, mainly due to a \$33.7 million increase in funds available for investments from securities sold under agreements to repurchase.

At June 30, 2007, the Bank's total liabilities were \$964.6 million compared with \$932.6 million at June 30, 2006. The increase of \$31.9 million represents 3.4% of the 2006 total liabilities.

ECONOMIC DEVELOPMENT BANK FOR PUERTO RICO
(A Component Unit of the Commonwealth of Puerto Rico)

Management's Discussion and Analysis

June 30, 2008 and 2007

Total time deposits were \$287.9 million as of June 30, 2007. Time deposits consist primarily of certificates of deposit of public funds from other governmental institutions, which totaled \$253.9 million. Deposits from other financial institutions were \$34 million. Total time deposits decreased by \$378,000. As of year-end, the total promissory notes and other note payable balance was \$511.9 million.

Securities sold under agreement to repurchase increased by \$33.7 million, from \$116.1 million in 2006 to \$149.9 million in 2007. Fluctuations in these securities are due to specific market conditions, which provide the Bank with funds and investment opportunities to generate net revenues.

The Bank had net assets of \$123.9 million at June 30, 2007, an increase of \$5 million or 4.2% when compared to June 30, 2006. Additional information about net assets composition is presented in note 11 to the basic financial statements.

Comparison of 2007 and 2006 Revenue, Expenses, and Changes in Net Assets

Condensed financial information on revenue, expenses, and changes in net assets is presented below (in thousands):

Revenue, expenses, and changes in net assets			Increase (decrease)	
	2007	2006	Amount	Percentage
Interest income from loans	\$ 14,307	\$ 11,460	\$ 2,847	24.84%

Operating income and change in net assets	\$ 5,037	\$ 5,807	\$ (770)	(13.26)

For the year ended June 30, 2007, the Bank yielded an operating income of \$5 million when compared to the operating income of \$5.8 million for the year ended June 30, 2006. The decrease in operating income resulted from the net effect of the following:

(a) Interest Income

Total interest income increased by approximately 14.3% or \$8.3 million, from \$58.5 million in 2006 to \$66.8 million in 2007. This increase in interest income was the result of increased transaction volumes and increases in the interest rate environment during the fiscal year.

ECONOMIC DEVELOPMENT BANK FOR PUERTO RICO
(A Component Unit of the Commonwealth of Puerto Rico)

Management's Discussion and Analysis

June 30, 2008 and 2007

(b) *Noninterest Income*

Noninterest income decreased by approximately \$600,000, from \$5.3 million in fiscal year 2006 to \$4.7 million in fiscal year 2007. This decrease was due to the net effect of a decrease in other income of \$1.3 million and an increase in the net realized and unrealized gains on investment of \$700,000.

The \$1.3 decrease in other income is mainly due to a \$1.1 million decrease in gain on sale of real estate owned and a \$300,000 decrease in recoveries from loans acquired by the Bank from the former Farm Credit Guarantee Fund and the Guarantee Loan Fund for Eligible Business previously charged off.

The increase in the net realized and unrealized gains on investment of \$700,000 results from the combined effect of a \$1,021,000 increase in net unrealized gains of investment securities, a \$417,000 decrease in the gain from sale of investments, and a \$90,000 decrease in the allowance for venture capital investments.

(c) *Provision for Loan Losses*

Compared to the 2006 figures, the provision for loan losses shows an increase of \$1.2 million. This change is mainly due to the creation of a new uncollateralized loan program for which there is no loss history and to management's periodic review of the allowance for loan losses. Impaired loans requiring an allowance for losses increased by \$4.5 million, from \$35.8 million to \$40.3 million, while the specific reserve for these increased by \$2.1 million, from \$14.5 million to \$16.6 million. As a percentage of the total loans portfolio, impaired loans represent 21.9% and 21% at June 30, 2007 and 2006, respectively.

Loan collections decreased from \$63.3 million during fiscal year 2006 to \$60.7 million for fiscal year 2007. As a percentage of the total loans portfolio, the allowance for loan losses represents 16.6% and 16.9% at June 30, 2007 and 2006, respectively.

(d) *Interest Expense*

Total interest expense increased by 15.2% or \$6.9 million, from \$45.6 million in 2006 to \$52.5 million in 2007. This increase in interest expense was the result of increased transaction volumes and an increase in the interest rate environment during the fiscal year.

(e) *Noninterest Expenses*

Noninterest expenses increased by approximately \$387,000 or 3.1% during fiscal year 2007. This increase in noninterest expenses resulted from the net effect of the following:

- Professional fees decreased by 24.4% or \$148,000, from approximately \$754,000 in 2006 to approximately \$606,000 in 2007. The decrease is mainly due to a decrease in legal and other fees during 2007.
- Advertising expense decreased by 20.9% or \$59,000, from approximately \$341,000 in 2006 to approximately \$282,000 in 2007.

ECONOMIC DEVELOPMENT BANK FOR PUERTO RICO

Management's Discussion and Analysis

June 30, 2008 and 2007

- Other noninterest expenses increased by approximately \$590,000 as compared to fiscal year 2006. This is mainly the result of the net effect of an increase of approximately \$296,000 in the provision for losses on foreclosed assets, an increase of approximately \$301,000 in the provision for legal claims, and a decrease of approximately \$7,000 in other miscellaneous expenses.

Analysis of the Overall Financial Position and Results of Operations

On the financial position, the average balance of funds available from deposits and the related investments has remained similar during the last two years thanks to the time deposits from other governmental institutions, which have provided adequate levels of funding to maintain the Bank's activities.

On the other hand, the decrease in interest rates during fiscal years 2007 and 2008 resulted in a decrease in interest income from loans, which reprice with the prime rate. Nevertheless, the increase in the loan portfolio has maintained the income producing capacity of the loan portfolio.

During the fiscal years 2007 and 2008, \$3.1 million were recovered in previously charged off loans.

Discussion of Significant Capital Assets and Long-Term Debt Activity

During fiscal year 2008, approximately \$538,000 in capital assets was acquired and approximately \$8,500 was retired. During the same period, \$275 million in promissory notes were issued, and \$160 million matured or amortized. As of year-end, the total promissory notes and other note payable balance was \$626.5 million. Additional information about capital assets and long-term debt activity is presented in notes 5 and 9 to the basic financial statements, respectively.

ECONOMIC DEVELOPMENT BANK FOR PUERTO RICO
(A Component Unit of the Commonwealth of Puerto Rico)

Notes to Basic Financial Statements

June 30, 2008 and 2007

(1) Organization and Summary of Significant Accounting Policies

Economic Development Bank for Puerto Rico (the Bank) was created by the Puerto Rico Development Bank Act No. 22 of July 24, 1985, as amended, and constitutes a public corporation of the Commonwealth of Puerto Rico (the Commonwealth). The Bank is a component unit included in the Commonwealth's financial reporting entity and is a separate legal entity. The Bank promotes the development of the private sector of the economy of Puerto Rico. This is accomplished by making direct loans, loan guarantees, loan participations, and/or direct investments available to any person or business organization devoted to manufacturing, agriculture, trade, tourism, or other service enterprises, whose economic activity may have the effect of substituting imports, without this being understood as a limitation.

The Bank's operation consists principally in granting commercial loans and capital investments to small businesses, receiving deposits from other governmental or commercial financial institutions, issuing notes and other debts, and investing in securities and other financial instruments, similar to a private commercial bank. All revenue, such as interest, gains, dividends, and fees related to these activities, are presented as operating income. All expenses related to these revenue activities, such as interest expense, provision for losses, and administrative expenses, are considered operating expenses. For financial statements presentation, operating revenue is segregated between interest income and noninterest income, and operating expenses between interest expense, provision for losses, and other noninterest expenses.

The Bank is not required to pay any taxes on any assets acquired or to be acquired for its operations or activities, or on the revenue received from any of its operations or activities.

On October 19, 2006, the Bank's board of directors created a component unit named Economic Development Bank Capital Investment (EDBCI). EDBCI is a blended component unit of the Bank, which is presented as a business-type activity. The balances and transactions of EDBCI have been blended with the Bank in accordance with U.S. generally accepted accounting principles because, though legally separated, it was created and can be dissolved through resolutions of the Bank's board of directors. The board of directors of EDBCI is the same as that of the Bank. EDBCI operation consists only of supporting the Bank's mission in promoting the development of the private sector of the economy of Puerto Rico, investing in equity, and other forms of capital of start-up, early, or later stage local enterprises or venture capital funds. During fiscal year 2007, the Bank transferred its capital investment portfolio, amounting to \$27,445,966, as initial capital to EDBCI. An additional \$30 million were approved for new capital investments as deemed necessary in EDBCI investment activity. The actual capital contribution during the year 2007 was \$29 million. Also, EDBCI was authorized to invest in corporate paper as part of a new notes payable program like the one described on note 9.

ECONOMIC DEVELOPMENT BANK FOR PUERTO RICO
(A Component Unit of the Commonwealth of Puerto Rico)

Notes to Basic Financial Statements

June 30, 2008 and 2007

The accounting policies followed by the Bank are in accordance with U.S. generally accepted accounting principles (GAAP), as applicable to governmental entities. The business-type activities of the Bank are accounted for as an enterprise fund. Accordingly, the Bank follows the accrual basis of accounting and the economic resources measurement focus. Revenue is recognized when earned, regardless of when received, and expenses are recognized when incurred, regardless of when paid. The following is a description of the most significant accounting policies:

(a) Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates made by management include the allowance for loan losses, allowance for losses on foreclosed assets, allowance for losses on loan guarantees, and allowance for venture capital investments.

(b) Basis of Presentation

Under Governmental Accounting Standards Board (GASB) Statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting*, the Bank is required to apply all applicable GASB pronouncements as well as statements and interpretations issued by the Financial Accounting Standards Board (FASB), Accounting Principles Board Opinions (APB), and Accounting Research Bulletins (ARBs) of the Committee on Accounting Procedure issued on or before November 30, 1989. In addition to applying FASB statements and interpretations, APB Opinions, and ARBs issued on or before November 30, 1989, a proprietary activity may also apply all FASB statements and interpretations issued after November 30, 1989, except for those that conflict with or contradict GASB pronouncements. The Bank has elected to also apply FASB statements and interpretations issued after November 30, 1989.

(c) Securities Purchased under Agreements to Resell

The Bank enters into purchases of securities under agreements to resell. The amounts advanced under these agreements are reflected as an asset in the accompanying statements of net assets. The securities underlying these agreements, mainly interest-bearing deposits with other banks and government securities, are held under safekeeping by a financial institution independent of the transaction.

(d) Investments

The Bank follows GASB Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*. This statement establishes accounting and financial reporting standards for all investments held by governmental external investment pools. For most other governmental entities, it requires that most investments be reported at fair value in the statements of net assets.

ECONOMIC DEVELOPMENT BANK FOR PUERTO RICO
(A Component Unit of the Commonwealth of Puerto Rico)

Notes to Basic Financial Statements

June 30, 2008 and 2007

The governing board authorizes the Bank to invest in the following:

- U.S. government and agencies obligations
- Obligations of the Commonwealth of Puerto Rico, its agencies, municipalities, public corporations, and instrumentalities
- Certificates and time deposits
- Commercial paper
- Bankers' acceptance
- Federal funds
- Securities purchased under agreements to resell
- Mortgage and asset-backed securities
- Corporate notes
- External investment pools

The Bank's investment policies also establish limitations and other guidelines on amounts to be invested in the aforementioned investment categories. Such policies provide the requirements in the institutions with which investment transactions can be entered into. In addition, the Assets, Liabilities, and Investments Committee and the board of directors of the Bank may approve, as necessary, other transactions that the Bank may enter into.

Investments in debt securities are presented at fair value. Money market investments and participating interest earning investment contracts with a remaining maturity at time of purchase of one year or less are presented at amortized cost. Changes in the fair value of investments are presented in net realized and unrealized gains (losses) on investments in the statements of revenue, expenses, and changes in net assets. Fair value is determined based on quoted market prices.

Investments also include common and preferred stocks of various local enterprises that do not have readily determinable fair value and investment positions in external investment pools. The investments in common and preferred stocks are temporary, and the Bank generally does not have the ability to exercise significant influence over the investees' operating and financial policies and, therefore, such investments are carried at the lower of cost or net realizable value based on management's evaluation of the financial condition of each investee. Because of uncertainties inherent in the estimation process, management's evaluation of the financial condition of the investees and the related assessment of net realizable value may change in the near term.

ECONOMIC DEVELOPMENT BANK FOR PUERTO RICO
(A Component Unit of the Commonwealth of Puerto Rico)

Notes to Basic Financial Statements

June 30, 2008 and 2007

Investment positions in external investment pools are reported at the net asset value of the shares held by the Bank. Such net asset value represents the fair value per share of the pools' underlying net assets. The financial statements of these pools include securities whose fair values have been estimated by the pools' managers in the absence of readily ascertainable market values. The Bank's external investment pools that are not registered with the Securities and Exchange Commission (SEC) are supervised by the Commissioner of Financial Institutions (CFI), which is the governmental agency that regulates venture capital funds and the banking industry in Puerto Rico.

(e) Loans

Loans are presented at the unpaid principal balance reduced by the allowance for loan losses, and any deferred fees or costs on originated loans. Unsecured loans are generally charged off against the allowance for loans losses upon management's assessment that a loan is uncollectible. Although one of the factors evaluated by management in making this assessment is the number of days past due, at present time, the Bank's charge-off policy does not require charging off loans after a predetermined number of days.

For collateralized loans, charge-offs are recognized for the amount of collateral deficiency upon repossession. Recoveries of loans charged off are credited to the allowance for loan losses.

The accrual of interest on loans ceases when loans become past due 90 days or more and/or on those loans undergoing judicial or bankruptcy proceedings. Once a loan is placed on nonaccrual status, all accrued but uncollected interest is reversed from interest income. Interest on all nonaccrual loans is thereafter included in earnings only to the extent actually collected. Loans designated as nonaccruing are not returned to an accrual status until interest is received on a current basis and those factors indicative of doubtful collection cease to exist.

The allowance for loan losses is maintained at a level believed adequate by management to absorb potential losses in the loan portfolio. Management's determination of the adequacy of the allowance is based on an evaluation of the portfolio, past loan loss experience, economic conditions, volume growth, and composition of the loan portfolio, and other relevant factors. Allowances for impaired loans are generally determined based on collateral values or the present value of estimated cash flows. Changes in the allowance relating to impaired loans are charged or credited to the provision for loan losses. Because of uncertainties inherent in the estimation process, management's estimate of credit losses inherent in the loan portfolio and the related allowance may change in the near term.

(f) Classification of Loans and Allowance for Loan Losses

The current portion of loans includes the active principal of loans with maturities of one year or less and past due over three months and/or those loans undergoing judicial or bankruptcy proceedings. Also, these include the estimated current portion of loans with maturity over one year. The resulting difference was reported as the noncurrent portion.

The allowance for loan losses was allocated similarly between current and noncurrent portion based on the loan classification.

(A Component Unit of the Commonwealth of Puerto Rico)

Notes to Basic Financial Statements

June 30, 2008 and 2007

(g) *Loan Guarantee Program*

Guarantee fees on the loan guarantee program are recognized as income when the fees are collected. Such fees are estimated not to exceed related guarantee expenses. The accrual for losses on loan guarantees is based on management's evaluation of the potential loss on each guarantee, net of amounts recoverable from collateral and the share of loss of the participating banks, and is included in other liabilities. Because of uncertainties inherent in the estimation process, management's estimate of the provision for losses on loan guarantees and the related accrual for losses on loan guarantees may change in the near term.

(h) *Loan Origination Costs and Commitment Fees*

The Bank defers loan origination and commitment fees and direct origination costs. The net amount is amortized over the contractual life of the related loan as a yield adjustment.

(i) *Real Estate Owned*

Real estate owned acquired in satisfaction of loans is included in other assets and is held for sale. Properties acquired through foreclosure are transferred to real estate owned and recognized at the lower of fair value minus estimated costs to sell or loan's carrying value, establishing a new cost basis. Subsequent declines in the value of real estate owned are provided for when it is probable the cost will not be recovered and that a loss will be incurred. An allowance for losses on real estate owned is maintained for subsequent valuation adjustments on a specific property basis.

(j) *Capital Assets*

Capital assets are defined by the Bank as assets with an individual initial cost of over \$500 and expected useful lives of over one year. Capital assets are stated at cost, less accumulated depreciation and amortization. Depreciation is computed on the straight-line basis over the estimated useful lives of the depreciable assets, which have been determined to be three years for computer software, five years for all furniture and equipment, and 40 years for building and improvements. Expenditures for major improvements that extend the useful life of the asset are capitalized. Maintenance and repairs are charged to expense.

(k) *Securities Sold under Agreements to Repurchase*

The Bank enters into sales of securities under agreements to repurchase. These agreements are presented as a liability in the accompanying statements of net assets. The securities underlying these agreements are usually held by the broker or its agent, with whom the agreement is transacted.

(l) *Accounting for Compensated Absences*

Compensated absences, such as unpaid vacation and sick leave pay, are accrued when incurred using the pay or salary rates in effect at the statement of net assets date. An additional amount is accrued for certain salary-related benefits associated with the payment of compensated absences.

Notes to Basic Financial Statements

June 30, 2008 and 2007

(m) *Statements of Cash Flows*

The accompanying statements of cash flows are presented in accordance with the provisions of GASB Statement No. 9, *Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities that Use Proprietary Fund Accounting*. For purposes of reporting cash flows, cash includes cash on hand, amounts due from banks, and items in process of collection.

(n) *Recently Issued Accounting Standards*

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities – including an amendment of FASB Statement No. 115* (Statement 159). Statement 159 gives the Bank the irrevocable option to carry most financial assets and liabilities at fair value that are not currently required to be measured at fair value. If the fair value option is elected, changes in fair value would be recorded in earnings at each subsequent reporting date. Statement 159 is effective for the Bank's 2009 fiscal year. The Bank is currently evaluating the impact the adoption of this statement could have on its financial condition, results of operations, and cash flows, should the Bank make the irrevocable option referred to above.

In September 2006, the FASB issued FASB Statement No. 157, *Fair Value Measurement* (Statement 157). Statement 157 defines fair value, establishes a framework for the measurement of fair value, and enhances disclosures about fair value measurements. The Statement 157 does not require any new fair value measures. The Statement 157 is effective for fair value measures already required or permitted by other standards for fiscal years beginning after November 15, 2007. The Bank is required to adopt Statement 157 beginning on July 1, 2008. Statement 157 is required to be applied prospectively, except for certain financial instruments. Any transition adjustment will be recognized as an adjustment to opening retained earnings in the year of adoption. In February 2008, the FASB approved a one-year deferral of Statement 157's fair-value measurement requirements for nonfinancial assets and liabilities that are not required or permitted to be measured at fair value on a recurring basis. The Bank is currently evaluating the impact of adopting Statement 157 on its results of operations and financial position.

(o) *Reclassifications*

Certain prior period amounts on the basic financial statements have been reclassified to conform to the 2008 presentation.

Interest rate risk – In accordance with its investment policy, the Bank manages its exposure to declines in fair values by limiting the weighted average maturity of its investment portfolio generally to less than three years.

Those investments related to the notes payable programs involve matched transactions that generate a fixed spread of income to the Bank. These were directly approved by the Bank's board of directors and are not subject to the maximum maturity policy. As of June 30, 2008 and 2007, the investments related to the notes payable program have a weighted average maturity of 10.5 and 16.5 years, respectively.

In addition, investments in external investment pools and equity securities are not subject to the maximum maturity policy since they do not carry a maturity date. These instruments are not sold on secondary markets and are not priced in any stock exchange, and as such, its fair value depends on the performance of the involved enterprises. The inherent risk in these investments is managed through credit analysis, periodic reviews of results of operations, and meetings with subject companies and investment pools managers.

Credit risk – The Bank's investment policy limits long-term investment in corporate debt to the top three ratings issued by nationally recognized statistical rating organizations, and short-term investments in corporate debt to the top two ratings issued by nationally recognized statistical rating organizations.

As of June 30, 2008, the Bank's investments in corporate paper were rated BBB+/A2 or A/A-1 by Standard & Poor's and A3/P2 or A1/P-1 by Moody's Investor Service, the Bank's investments in collateralized mortgage obligations were rated AAA or AAA/A+ by Standard & Poor's and AAA, AAA(*-) or AAA/F1 by Fitch Ratings, the Bank's investment in Federal National Mortgage Association were rated AAA by Standard & Poor's and AAA by Fitch Ratings, the Bank's investment in Federal Home Loan Bank were rated AAA by Standard & Poor's and Aaa or Aaa/P1 by Moody's Investor Service and the Bank's investment in Federal Farm Credit Bank were rated AAA by Standard & Poor's and AAA by Fitch Ratings.

ECONOMIC DEVELOPMENT BANK FOR PUERTO RICO

Notes to Basic Financial Statements

June 30, 2008 and 2007

As of June 30, 2007, the Bank's investments in corporate paper were rated BBB+/A2 by Standard & Poor's and A/F1 or A-/F1 by Fitch Ratings, the Bank's investments in collateralized mortgage obligations were rated AAA or AAA/A+ by Standard & Poor's and AAA or AAA/F1+ by Fitch Ratings, the Bank's investment in Federal National Mortgage Association were rated AAA/A+ by Standard & Poor's and AAA/F1 by Fitch Ratings and the Bank's investment in Federal Home Loan Bank were rated Aaa/P1 by Moody's Investor Service.

The Bank, through EDBCI, also invests in venture capital through external investment pools and through direct investment in equity securities. The Bank's investments in external investment pools and equity securities are not rated by a nationally recognized statistical rating organization. The related credit risk is measured through credit analysis, periodic reviews of results of operations, and meetings with subject companies' management. In addition, a reserve for possible losses in venture capital investments is recorded as a measure of providing a fair value in the financial statements. As of June 30, 2008 and 2007, the venture capital balances comprised the following:

	2008	2007
External investment pools	\$ 31,228,620	\$ 27,626,446
Equity investments	8,914,000	8,586,662
	40,142,620	36,213,108
Allowance for losses in venture capital investments	(7,819,844)	(7,167,142)
Fair value of venture capital investments	\$ 32,322,776	\$ 29,045,966

Custodial credit risk deposits – Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to the transaction, the Bank may not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. At June 30, 2007 and 2008, securities investments were registered in the name of the Bank and were held in the possession of the Bank's custodian institution.

The Bank was exposed to the following custodial credit risk for investments held at June 30, 2008:

Uninsured and registered, with securities held by the counterparty's trust department or agent in the Bank's name	\$ 995,592,615
Uninsured and unregistered, with securities held by the Bank	32,322,776
Total	\$ 1,027,915,391

Concentration of credit risk – The Bank places no limit on the amount it may invest in any one issuer as a percentage of the investment portfolio. As of June 30, 2008, more than 5% of the Bank's investments are in Federal National Mortgage Association notes (30.6%), Federal Home Loan Bank notes (5.1%), and Popular North America corporate notes (40.8%). As of June 30, 2007, more than 5% of the Bank's investments are in Federal National Mortgage Association notes (63.3%), Federal Home Loan Bank notes (6.3%), and Popular North America corporate notes (16.3%).

The Bank has defined impaired loans as all loans with interest and/or principal past due 90 days or more and other loans for which, based on current information, it is probable that the debtor will be unable to pay according to the contractual terms of the loan agreement. The Bank generally measures impairment based upon the present value of a loan's expected future cash flows, except where foreclosure or liquidation is probable or when the primary source of repayment is provided by collateral. In these circumstances, impairment is measured based upon the fair value of the collateral less estimated selling and disposal costs. The present value of a loan's expected future cash flows is calculated using the loan's effective interest rate based on the original contractual terms.

Cash payments received on impaired loans are recorded in accordance with the contractual terms of the loan. The principal portion of the payments is used to reduce the principal balance of the loan; the interest portion is recognized as interest income. When management believes that collectibility of principal is doubtful, the interest portion may be applied to principal.

(9) Promissory Notes and Other Note Payable

Promissory notes and other note payable at June 30, 2008 and 2007 are summarized as follows:

	2008	2007
Promissory notes	\$ 615,000,000	\$ 500,000,000
Other note payable	11,523,813	11,875,578
Total	\$ 626,523,813	\$ 511,875,578

On May 22, 2003, the Bank was authorized to issue up to \$300 million in collateralized promissory notes. During the fiscal year 2005, the authorized amount was increased up to \$500 million. During fiscal year 2008, the Bank, through its subsidiary EDBCI, was authorized to issue an additional \$275 million in collateralized promissory notes. The proceeds received by the Bank from the sale of these notes shall be invested in obligations that qualify as permitted investments under applicable laws and the investment guidelines adopted by the Bank. Such notes have maturities not exceeding 20 years. These notes contain certain call and put options written by the Bank and the creditor. The put options grant the Bank the exercisable right, at the Bank's sole discretion, to require the note holder to purchase, on established exercise dates, the collateral of this note at a price equal to 100% of the outstanding principal amount of the collateral securities. The call option permits the note holders, on the same established dates of the Bank's put option, to require the Bank to redeem the promissory notes at their outstanding principal amount. The call options on the notes are considered clearly and closely related to the notes, while the mirror put options held by the Bank are considered in accounting for the fair value of the underlying investments. As a result no separate asset or obligation is recorded related to the put and call options.

At June 30, 2008 and 2007, the aggregate principal balance of promissory notes outstanding under these programs amounted to \$615 million and \$500 million, respectively. These notes pay interest semiannually, bear interest rates at June 30, 2008 ranging from 4.2% to 6.2%, and mature at various dates through August 8, 2025. These promissory notes are collateralized with investment securities with an aggregate fair value of \$607,256,000.

The other note payable is due to GDB (collateralized by a real estate mortgage), bears interest at the rate of 6% per annum, pays interest semiannually in June and December, and principal is paid each June. The note matures on June 1, 2026 and provides for annual payments of \$1,064,300 including interest.

ECONOMIC DEVELOPMENT BANK FOR PUERTO RICO
(A Component Unit of the Commonwealth of Puerto Rico)

Notes to Basic Financial Statements

June 30, 2008 and 2007

The Bank is a recipient of two grants from the Economic Development Administration Directive System (EDA), subscribed to the U.S. Department of Commerce to operate a program under a Revolving Loan Fund directed to assist businesses that suffered physical or economic damage due to the effects of Hurricane Hugo, and to advance the economic development of Puerto Rico. The Bank matched EDA's award pursuant to the terms of the grant agreements. The funds received from the collection of principal and interest of loans granted under the program are deposited in the fund to be used to disburse new qualified loans. At June 30, 2008 and 2007, the outstanding principal of loans granted under the terms of EDA Revolving Loan Fund amounted to \$4,386,257 and \$4,794,363, respectively, and are included in loans in the accompanying statements of net assets. The grants are routinely subject to financial and compliance audits in accordance with the provisions of the U.S. Office of Management and Budget Circular A-133 or to compliance audits by EDA. The latter has the authority to determine liabilities as well as to limit, suspend, or terminate the federal assistance.

On October 6, 1989, a revolving loan fund grant that was administrated by GDB was transferred to the Bank for administration under the same terms as when the program was established by GDB. At the time, such fund had a total contribution of \$1,250,000 (\$1,000,000 from EDA and \$250,000 from GDB) and a portfolio consisting of 15 loans with an aggregate outstanding principal balance of \$504,299. The fund was pooled into the fund previously administered by the Bank when the Bank reimbursed \$250,000 to GDB for their original contribution to such fund. As a result, the Bank's contribution to the fund equals 25% of EDA's contribution to the fund.

The Commonwealth approved Law No. 212 of August 29, 2000, as amended, which creates the Day Care Centers Loan Fund, for the purpose of financing the development of day care centers for children, multiple activity centers for elderly persons and long-term care institutions. The Bank is responsible for the administration of the fund. At June 30, 2008 and 2007, the outstanding principal of loans granted under the terms of the Day Care Centers Loan Fund amounted to \$3,389,030 and \$3,552,066, respectively, and are included in loans in the accompanying statements of net assets.

Restricted net assets related to the special loans programs as of June 30, 2008 and 2007 consist of the following:

	2008	2007
Cash and due from banks	\$ 2,374,094	\$ 2,241,856
Loans and interest receivable, net of allowance for loan losses of \$1,362,253 and \$1,316,264 in 2008 and 2007, respectively	6,452,701	7,065,500

(12) Interagency Agreements

The Bank has entered into interagency agreements with various government agencies. Such agreements provide for the deposit of funds in the Bank amounting in the aggregate to approximately \$1.9 million to be used for loan programs to benefit socially and economically disadvantaged families and unemployed persons. Loans are granted based on the requirements established by such governmental agencies and the Bank is responsible for the administration of the loan portfolio. At June 30, 2008, these fund programs had made payments of approximately \$202,000 to the Bank for loans guaranteed; therefore, these loans are not included in the accompanying statements of net assets.

The Bank entered into an interagency agreement with the Economic Development and Commerce Department (a governmental unit of the Commonwealth). Such agreement provides for the transfer of the funds from the previously created Hurricane Georges Guarantee Loan Fund and the Education Loan Program Guarantee Fund to a new loan fund program. The new loan fund program grants direct loans and guarantees to small and medium-sized entrepreneurs in the economic sectors of manufacturing, services, and commerce. Guarantee claims under Hurricane Georges Guarantee Loan Fund and Education Loan Program Guarantee Fund may be paid by the new fund. At June 30, 2008 and 2007, the outstanding principal of loans granted under all the Economic Development and Commerce Department loans and loan guarantee programs amounted to \$14,498,688 and \$15,327,550, respectively, of which \$11,524,545 and \$13,113,958, respectively, are included in loans in the accompanying statements of net asset, while the remaining balance had been paid to the Bank by the new fund.

The Bank entered into an interagency agreement with the Tourism Company of Puerto Rico (a component unit of the Commonwealth) to create the Loan and Guarantee Tourism Fund. At June 30, 2008 and 2007, the outstanding principal of loans granted under this fund amounted to \$9,368,000 and \$14,594,000, respectively, and are included in loans in the accompanying statements of net assets.

On August 17, 2001, the Commonwealth approved Law No. 117, which creates the Agricultural Guarantee Loan Fund to secure loans granted by the Bank and commercial banks to farmers and agricultural entities. This fund will be financed through annual appropriations to be provided by the Commonwealth up to \$100 million during a four-year period. The Bank has entered into an alliance with the Commonwealth's Department of Agriculture (the Department) for the administration of this fund, which among other things, requires that the Department establish the operational procedures of the Fund, while the Bank will administer the fund. At June 30, 2008, the fund had received \$10 million related to the initial appropriation, which was deposited in the Bank. At June 30, 2008 and 2007, the outstanding principal of all loans granted under the Agricultural Guarantee Loan Fund program amounted to \$17,848,074 and \$22,603,803, respectively, of which \$12,159,571 and \$19,594,134, respectively, are included in loans in the accompanying statements of net asset, while the remaining balance had been paid to the Bank by the fund.

Notes to Basic Financial Statements

June 30, 2008 and 2007

The Bank entered into an interagency agreement with the Corporation for the Development of the Arts, Sciences, and the Cinematographic Industry of Puerto Rico (a component unit of the Commonwealth) to create the Loan and Capital Investments Guarantee Fund for the Cinematographic Industry and the Loan Guarantee Fund for the Television. At June 30, 2008 and 2007, the outstanding principal of loans granted under this fund amounted to \$300,000, and are included in loans in the accompanying statements of net assets.

The financial statements of these funds were audited by other independent auditors whose reports thereon, dated August 29, 2008, express an unqualified opinion. These funds are not included within the Bank's financial statements.

The Bank and the governmental agencies participating in the interagency agreements described above are jointly liable for any litigation that may arise in connection with the administration of such loan programs. At June 30, 2008 and 2007, there was no pending or threatened litigation under such programs.

(13) Commitments and Contingencies

(a) *Litigation*

At June 30, 2008, the Bank is a defendant in various lawsuits arising from the ordinary course of business. Management, after consultation with legal counsel, is of the opinion that the ultimate liability, if any, resulting from such lawsuits would not be material in relation to the Bank's financial position and results of operations.

Because of the uncertainties inherent in the evaluation of pending or threatened litigation, the Bank's ultimate liability under such claims may be significantly different from management's current estimate.

(b) *Loan Guarantee Program*

At June 30, 2008 and 2007, total outstanding loan guarantees amounted to approximately \$378,000 and \$380,000, respectively. The Bank has recorded an accrual for losses on loan guarantees amounting to approximately \$170,000 at June 30, 2008 and 2007, which is included in other current liabilities in the accompanying statements of net assets.

(c) *Other Risks*

The Bank is exposed to various risks of loss related to torts, theft, casualty, errors, and omissions and other losses for which the Bank carries commercial insurance. Settled claims have not exceeded insurance coverage in any of the past three fiscal years. Also, the Bank obtains workers' compensation coverage from another component unit of the Commonwealth.

(14) Fair Values of Financial Instruments

The following summarizes the methods and assumptions used by the Bank in estimating the fair values of financial instruments:

- *Cash and Due from Banks* – The amount reported in the statements of net assets for cash and due from banks approximates its fair value.
- *Interest-Bearing Deposits with Other Banks and Commercial Paper* – Maturity dates of interest-bearing deposits with other banks and commercial paper at June 30, 2008 and 2007 are less than one year. The amount reported in the statements of net assets for interest-bearing deposits and commercial paper approximates its fair value due to the short-term maturities and the nature of the instruments.
- *Securities Purchased under Agreements to Resell* – Maturity dates of securities purchased under agreements to resell at June 30, 2008 and 2007 are less than one year except for a \$20 million security outstanding as of June 30, 2007, which matures on June 15, 2012. This security is matched with a liability, which matures on March 7, 2012; thus, the effect of market changes in its fair value will be offset. The amount reported in the statements of net assets approximates its fair value due to the short-term maturities and the nature of the instruments.
- *Investment in Debt Securities* – Debt securities are carried at fair value. Debt securities that are primarily traded in secondary markets were valued using either market prices, pricing models, or quoted market prices of financial instruments with similar characteristics.
- *External Investment Pools and Equity Investments* – The fair value of investment positions in external investment pools was estimated by the pools' managers in the absence of readily ascertainable market values. The carrying value of investments in equity securities of local enterprises approximates fair value as estimated by management based on an evaluation of the investees' financial position.
- *Loans* – Given the type of development loans originated by the Bank, and the level of nonaccrual and impaired loans, it is not practicable to estimate fair value of the portfolio.
- *Accrued Interest Receivable* – The amounts reported in the statements of net assets approximate fair value because of the short term nature of this balance.
- *Time Deposits* – Maturity dates of time deposits range from one to 547 days. The carrying amounts approximate their fair values at the reporting date due to the short term maturities.
- *Securities Sold under Agreements to Repurchase* – Maturity dates of securities sold under agreements to repurchase at June 30, 2008 and 2007 are less than one year except for seven and two securities amounting to \$104.8 million and \$39 million, respectively, which mature between September 4, 2010 and March 27, 2014. The fair value at the reporting date exceeds its carrying amounts.
- *Promissory Notes and Other Note Payable* – The fair value of promissory notes with variable interest rates and of the other note payable with a fixed rate approximates their carrying value. Pertinent information concerning these transactions is provided in note 9.

(15) Significant Group Concentrations of Credit and Market Risk

The Bank's business activities are with customers located in Puerto Rico. The Bank's loan transactions are all directed toward small-and medium-size businesses in all sectors of Puerto Rico's economy. The collateral held on the Bank's loans varies, but usually includes chattel and real estate mortgages.

(16) Retirement Plans

(a) Defined Benefit Pension Plan

The Employees' Retirement System of the Commonwealth and its Instrumentalities (the System) created pursuant to Act No. 447 of 1951, as amended, is a cost sharing multiple employer defined benefit pension plan sponsored by and reported as a component unit of the Commonwealth. All regular employees of the Bank hired before January 1, 2000 and less than 55 years of age at the date of employment became members of the System as a condition to their employment. No benefits are payable if the participant receives a refund of their accumulated contributions.

Notes to Basic Financial Statements

The System provides retirement, death, and disability benefits pursuant to legislation enacted by the Commonwealth's legislature. Disability benefits are available to members for occupational and nonoccupational disabilities. However, a member must have at least 10 years of service to receive nonoccupational disability benefits. Retirement benefits depend upon age at retirement and number of years of creditable service. Benefits vest after 10 years of plan participation.

Members who have attained 55 years of age and have completed at least 25 years of creditable service or members who have attained 58 years of age and have completed 10 years of creditable service are entitled to an annual benefit, payable monthly for life. The amount of the annuity shall be 1.5% of the average compensation multiplied by the number of years of creditable service up to 20 years, plus 2% of the average compensation, as defined, multiplied by the number of years of creditable service in excess of 20 years. In no case will the annuity be less than \$200 per month.

Participants who have completed 30 years of creditable service are entitled to receive the merit annuity. Participants who have not attained 55 years of age will receive 65% of the average compensation, as defined; otherwise, they will receive 75% of the average compensation, as defined.

Commonwealth legislation requires employees to contribute 5.775% for the first \$550 of their monthly gross salary and 8.275% for the excess of \$550 of monthly gross salary. The Bank is required by the same statute to contribute 9.275% of the participant's salary.

(b) *Defined Contribution Plan*

The Legislature of the Commonwealth enacted Act No. 305, which amends Act No. 447, to establish, among other things, a new defined benefit contribution savings plan program (System 2000).

System 2000 became effective on January 1, 2000. Employees participating in the System as of December 31, 1999 elected either to stay in the defined benefit plan or transfer to System 2000. New regular employees of the government on or after January 1, 2000 became members of System 2000.

System 2000 is a hybrid defined contribution plan, also known as a cash balance plan. Under this new plan, there is a pool of pension assets, which is invested by the System, together with those of the System. Benefits at retirement age will not be guaranteed by the Commonwealth. The annuity will be based on the employees' contribution (with a minimum of 8.275% of the employees' salary up to a maximum of 10% of the monthly gross salary), which will be invested in one of three investment options. The Bank's required contribution is 9.275% of the employees' salary.

System 2000 reduces the retirement age from 65 years to 60 years for those employees who joined the current plan on or after April 1, 1990.

Total employee contributions during the years ended June 30, 2008, 2007, and 2006 to the above plans amounted to approximately \$469,000, \$459,000, and \$462,000, respectively. Total payroll covered for the years ended June 30, 2008 and 2007 was approximately \$5,768,000 and \$5,595,000, respectively.

June 30, 2008 and 2007

The Bank's contributions during the years ended June 30, 2008, 2007, and 2006 to the above plans amounted to \$532,000, \$522,000, and \$525,000, respectively, which represented 100% of required contributions.

Additional information on the System will be provided in its financial statements for the year ended June 30, 2008. That report may be obtained by writing to Employees' Retirement System of the Commonwealth and its Instrumentalities, P.O. Box 42003, San Juan, PR 00940-2003.

(17) Financial Instruments with Off-Balance-Sheet Risk

In the normal course of business, the Bank is a party to financial instruments with off-balance-sheet risk to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include commitments to extend credit and to purchase investment and mortgage-backed securities, financial guarantees, and interest rate exchange agreements. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of amounts recognized in the accompanying statements of net assets. These off-balance-sheet risks are managed and monitored in manners similar to those used for on-balance-sheet risks. The Bank's exposures to credit losses for lending commitments are represented by the contractual amount of such transactions. The notional amounts for other off-balance-sheet risks express the dollar volume of the transactions, but the credit risk might be lower.

At June 30, 2008 and 2007, the off-balance-sheet risks consisted of the following:

	2008	2007
	(In thousands)	
Financial instruments whose credit is represented by contractual amounts:		
Financial guarantees	\$ 378	\$ 380
Commitments to extend credit	22,090	24,554
Commitments to invest in venture capital	19,679	23,834

Financial guarantees written are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements. The credit risk involved in issuing financial guarantees is essentially the same as that involved in extending loan facilities to customers.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained upon extension of credit is based on management's credit evaluation of the counterparty. Collateral held varies but may include property, plant, and equipment, and income-producing commercial properties.

(20) Subsequent Events

Due to the significant disruptions in the financial markets subsequent to June 30, 2008, the value of the Bank's investments has been negatively impacted. As a result, during July and August 2008 the Bank recorded net unrealized losses of \$1.2 million on investments existing at June 30, 2008.

In addition, the credit rating of certain investments in corporate paper and collateralized mortgage obligations were downgraded. Accordingly, the Bank's investments in corporate paper were rated BBB+/A-2 or A/A-1* by Standard & Poor's and A3/P2 or A2/P-1 by Moody's Investor Service, and the Bank's investments in collateralized mortgage obligations were rated AAA, AAA/A+, or B by Standard & Poor's and AAA, AAA/F1, A(*-), or BB(*-) by Fitch ratings.
